INDEX CHEMICUS®

IC®

Institute for Scientific Information, Inc.
Eugene Garfield, Ph.D., *President and Publisher*
Martha J.G. McKinney, *Production Manager*

Current Abstracts of Chemistry is published weekly to provide chemists with a current guide to chemical research and chemical technology. *Section A* contains abstracts of articles reporting the synthesis, isolation, and identification of new compounds, and of articles reporting new chemical reactions. Graphic and narrative abstracts are prepared from the original article or selected from the source journal. Formulas and flow-diagrams are used extensively to facilitate rapid scanning and discovery of material relevant to the user's research. *Section B* contains author abstracts and summaries selected from source journals to provide the user with a current survey of all areas of chemical specialization. In both sections *use-profile* and *technique* data symbols alert the user to potential and proven activities of the compounds and to analytic procedures used by the investigator.

Index Chemicus® is the index section of **Current Abstracts of Chemistry.** IC® is published monthly and cumulated semiannually and annually. IC contains journal, author, molecular formula, and subject indexes. The semiannual and annual volumes contain in addition a Rotaform Index® of molecular formulas.

There are two rate schedules for **Current Abstracts of Chemistry and Index Chemicus:** educational and industrial. The educational rate applies to universities, colleges, medical school, and hospitals. The industrial rate applies to all other organizations.

Educational rate . . . . . $750 Industrial rate $1100

Each base (first) subscription entitles the subscriber to receive two copies of the CAC section, and one copy of the IC section. In cases of multiple subscriptions, both the educational and industrial rates drop to $200 per unit (CAC or IC section) for additional subscriptions up to ten, and $100 per unit for subscriptions beyond ten.

For further information: **In the United States** contact Mr. Charles E. Granito, 325 Chestnut Street, Philadelphia, Pa. 19106. Telephone (202)-338-5900. Cable SCINFO. **In the Washington area** contact Mr. Gerald Sophar, 7315 Wisconsin Avenue, Bethesda, Maryland 20014. Telephone (301)-657-2366. **In Europe** contact Mr. Anthony Cawkell, 132 High Street, Uxbridge, Middlesex, Telephone Uxbridge 30085 or Mr. Peter Aborn, 49 Avenue Paul Doumer, Paris 16eme. Telephone 870 80 58. **In Japan** contact Mr. Takashi Yamakawa, Tsutsumi Building, 13-12 1-chome, Shimbashi Minato-Ku, Tokyo. Telephone 502-6471.

ANNUAL CUMULATIVE INDEX–1970

VOLUMES 36 TO 39

ISSUES 319 TO 370

ABSTRACTS 125,572 TO 171,532

INTRODUCTION

This Annual Cumulative Index covers Volumes 36 to 39 inclusive, issues 319 through 370, of *CURRENT ABSTRACTS OF* CHEMISTRY AND INDEX CHEMICUS™. These issues contained abstracts of 45,961 articles. The cumulated Molecular Formula Index contains 197,559 entries, the Author Index 116,876 entries, and the Subject Index 74,590 entries.

The Annual Cumulative Index replaces the monthly and semiannual interim indexes to Volumes 36,37,38 and 39 which should now be discarded. Detailed binding instructions are given on page 671 of this issue. Additional specific details about each index are provided separately in the introductions to the Subject, Molecular Formula, Author and Journal Indexes.

Each year a detailed statistical analysis of the *CURRENT ABSTRACTS OF CHEMISTRY AND INDEX CHEMICUS** from its inception is provided. Table I is an analysis by year of the literature—not the year of CAC&IC™ Data on the 1970 literature is not completely available until the middle of 1971 due to publication lags of certain journals.

Table II is an analysis based on the year of CAC&IC*

Table III shows that the language distribution of papers in synthetic chemistry has not changed significantly during the past ten years, except for English and Japanese, indicating the increasing acceptance of English as the international language of science.

MOLECULAR FORMULA INDEX

ABSTRACTS 125,572 TO 171,532

Each column in this Molecular Formula Index is consecutively numbered. There are 1,125 columns in this annual cumulation. For greater clarity and convenience, the molecular formulas appear at the left hand side of the columns, followed by one or more periods, followed by the compound's address which consists of the abstract number and the compound number. Furthermore, the C-H headings have been indented. When a C-H grouping is continued in the next column, its heading is repeated at the top of that column (see e.g., top line in column 35).

A hyphen (-) separates a compound number from its abstract number. Diagonal lines (/) separate compound numbers appearing in the same abstract, as well as abstract numbers, as e.g., in fourth line, column 30. The last abstract-compound number listed for any molecular formula is never followed by a (/) or (-) and the appearance of any punctuation mark at the end of the line indicates that additional abstract-compound numbers for that formula will follow in the next line, column, or page.

An asterisk (*) instead of a compound number indicates that the compound is not a new compound but the end-product of a new reaction or a new synthesis. Indexing new syntheses is an innovation incorporated into *CURRENT ABSTRACTS OF CHEMISTRY AND INDEX CHEMICUS*™ in 1970.
